SUMMARY:

Full Stack Developer with hands-on experience in MERN stack and AWS, specializing in building scalable, user-focused web applications. Proven ability to work across frontend and backend, deploy production-ready systems. Strong focus on performance, clean architecture, and real-world problem solving.

TECHNICAL SKILLS:

- **Frontend -** NEXT.js, React JS, Javascript, Tailwind CSS
- **Backend -** Node JS, Express, Pug/Ejs, AWS lambda, S3, IAM
- **Databases -** MongoDB
- **Familiar/Worked With-**, Pannellum JS, GSAP, Matter.js

EXPERIENCE:

Full stack Developer - Techinovativ | July 2025 - Present
- Developed and maintained dashboard and blog backend using AWS Lambda.
- Implemented image storage and retrieval using Amazon S3.
- Worked with IAM roles and permissions to secure AWS resources.
- Contributed to building and improving company website pages and Client web apps.

Full stack Developer - Freelancing | May 2024 - Feb 2025
- Developed a MERN-based virtual coworking application (FocusBuddy).
- Implemented authentication, video calls, scheduling, and payments.
- Deployed and maintained the application during its active period.

Wordpress / Javascript Developer - Antriksh Global | Mar 2023 - Mar 2024
- Worked on the Godrej Properties project using JavaScript and Pannellum.js.
- Developed a 3D panorama image viewer with custom user interactions.
- Implemented GSAP and ScrollTrigger animations to enhance user experience.
- Created landing pages for international clients, including a Dubai-based client.

NodeJS Developer Internship - Solar Secure Solutions | Jul 2022 - Sep 2022

- Strengthened fundamentals of JavaScript and backend development.
- Developed backend features for an E-commerce food industry application using Node.js and Express.
- Worked on API development and basic database operations.

PROJECTS:

Spendwise - AI Smart Expense Tracker- (link - https://spendwise-azure.vercel.app/)

- Built an AI-powered expense tracker with automatic categorization.
- Implemented Hinglish natural language input using LangChain + Mistral.
- Generated spending insights using MongoDB aggregation pipelines.
- Visualized analytics using Recharts.

FocusBuddy - (link - https://focusbuddy-rho.vercel.app/)

- Developed a virtual coworking platform aimed at improving productivity for students preparing for government exams.
- Features like: - Calendar-based video call scheduling, Real-time video calls and chat, User authentication and profiles, Payment integration.

Godrej Properties - (demo - https://godrejproperties.antrikshglobal.com/)

- Developed a 3D image panorama viewer using Pannellum.js and vanilla JavaScript.
- Customized viewer interactions and UI behavior.
- Implemented a click-based popup system to display location details within the panorama.

EDUCATION:
