SUMMARY:

I am seeking a challenging dynamic position within an organization, which is growing rapidly. In time I aim to develop my skills and thus procure a good job profile. I am confident of achieving this objective by my dedication and hard work. I am positive that I would serve as an asset to the organization.

TECHNICAL SKILLS:

- **Frontend -** Bootstrap, Tailwind CSS, Javascript, Jquery, React JS
- **Libraries -** Pannellum JS, GSAP, Scroll Trigger
- **Backend -** Node JS, Express, Pug
- **Databases -** MYSQL, MongoDB
- **Familiar with or Learning -** Typescript

EXPERIENCE:

Web Developer - Antriksh Global | Aug 2023 - Mar 2024

- I got to work on the **Godrej Properties** project which I made using **javascript, pannellum js**, it was my **best work** during my work period.
- Since I wanted to do something different,I learned **GSAP & ScrollTrigger Animations** and started applying it on websites I worked on.

Web Developer Intern - Antriksh Global | Mar 2023 - Aug 2023

- Got to learn about the **UI/UX** of a website.
- Involve making web pages using elementor, add CSS animations and using Javascript to add Interactive features.
- Also worked on making a boardroom/landing page for **Dubai Client**.

NodeJS Developer Internship - Solar Secure Solutions | Jul 2022 - Sep 2022

- First part of the internship was fully focused on getting familiar with core topics
- After that I worked on the Backend part of an E-Commerce Food Industry Website using NodeJS

PROJECTS:

Godrej Properties - (demo - https://godrejproperties.antrikshglobal.com/)
- Created a 3d image panorama viewer using pannellum.js and used vanilla js to customize it.
- Made a popup which shows the place name on the user click position.

Frontend Animation Website I -

(demo - https://r1414a.github.io/Frontend-Animation-Website-I/)
- Learned how to create animated websites using technologies like GSAP, locomotive & Scroll Trigger.

Frontend Animation Website II -

(demo - https://r1414a.github.io/Frontend_Animation-Website-II/)
- Learned how to create animated websites using technologies like GSAP, locomotive & Scroll Trigger.

Book Directory - (demo - https://book-directory-app.onrender.com)
- App where you can add a book written by author,by filling a form, add author, delete book details means you can perform all CRUD operations.
- Database used for crud operations MongoDB.
